## Chapter 3. Subject Locator

## **CONTENTS**

	Page
General Information	3-1
Subject Locator	3_1

## **GENERAL INFORMATION**

The Subject Locator is an index designed to quickly identify the tables (matrices) in the summary file. This index is arranged in alphabetical order by the name of a subject. Under each subject heading appears the universe or the type of entry being tabulated (shown in italics) and the relevant table number. Each variable is arranged alphabetically by universe, then by variable of cross tabulation, if any. If you are looking for a table showing age by sex for all persons, check the index under either "Age" or "Sex."

An **asterisk (\*)** next to the universe indicates that the matrix is repeated by nine race and/or Hispanic or Latino groups. These matrices are identified in the file with a suffix that pertains to a specific group. For example, PCT13, when repeated for the White alone population, is labeled PCT13A. The nine groups, with their specific suffixes, are:

White alone	A suffix
Black or African American alone	B suffix
American Indian and Alaska Native alone	C suffix
Asian alone	D suffix
Native Hawaiian and Other Pacific Islander alone	E suffix
Some other race alone	F suffix
Two or more races	G suffix
Hispanic or Latino	H suffix
White alone, not Hispanic or Latino	l suffix

See the sections "List of Tables (Matrices)" and "Summary Table Outlines" for specific examples.

## **SUBJECT LOCATOR**
